Acts as Effective
Visual Deterrent

4x Solar Panels
& Controller for
Consistent Power

Hire

Benefits of Hire

- Low weekly cost
- Delivered and set up on site
- Managed and maintained by us
- Fully monitored
- Mobile response available
- Short term/long term options
- Purchase options also available

24 hour Monitoring

Monitoring Services

Reactive CCTV Monitoring

Using motion detection or video analytics, we can respond to activations at your site, issue audio warnings and request police response where required. We are on the forefront of testing new technologies.

Visually Verified Monitoring

As well as offering standard intruder and fire monitoring, we can offer a visual confirmation of these alarms. Drastically reducing false activations and your chances of losing your URN.

Live CCTV Monitoring

From our purpose-built ARC/RVRC, we can monitor your systems 24 hours a day, 365 days a year with access to live images. We also have a secure web and mobile portal, where you can check the live feeds yourself.

Intruder Alarm Monitoring

These are grade 2 alarm certified solutions giving additional peace of mind and protection along with visual verification and home automation.

TOTAL PEACE OF MIND

This site is monitored 24/7 by Rhino Fire & Security Systems Ltd for crime prevention, public and site safety, and the prosecution of offenders. CCTV and audio recording may be in progress, and all activity may be recorded & monitored. No liability is accepted.

This site is professionally monitored with a security guard response for unauthorized access. For more information, contact Rhino Fire & Security Systems LTD - Protection Work. Monitor More.

Our highly trained security guards act as vigilant protectors of your site, deterring crime and ensuring your project remains secure 24/7.

Our security guarding services include on-site construction guards and mobile security patrols, both available as flexible and customized solutions to meet the specific needs of your project.
